

It's a Question of Health

Help reduce HIV by getting circumcised today

It's a Question of Health

Help reduce HIV by getting circumcised today

- Voluntary Medical Male Circumcision (VMMC) reduces men's chances of getting HIV and other STIs.
- It is a safe and simple procedure.
- It has other health benefits for you and your sexual partner.
- To prevent HIV, you still need to be faithful to one partner and use a condom.
