

Male Circumcision for HIV Prevention at ICASA 2011

04.12.2011

Satellite Symposium

A Call to Action: Accelerating the Pace of Scale Up of Voluntary Medical Male Circumcision for HIV Prevention, 10:00-11:00h

- Reviewing the State of VMMC Scale-up in the Region and the Need for Increasing the Pace to Meet Targets and Achieve Impact
Presenter: Dr. Ying-Ru Lo, World Health Organization
- Replicating Scale-up Successes in New Countries and Geographic Areas, Including a Minimum Package of Support to Governments (based on Kenya experience)
Presenter: Dr. Mores Loolpapit, FHI 360
- MC Devices: What They May and May Not Do to Accelerate Scale-up
Presenter: Dr. Peter Cherutich, Kenya NASCOP
- Generating Demand for MC, Including Leveraging the Role of Women
Dr. Kawango Agot, Impact Research and Development Organization, Kenya

05.12.2011

Satellite Symposium

UNAIDS-PEPFAR Voluntary Medical Male Circumcision Satellite Session: Costing, Impact and Challenges of Accelerated Scale-Up in Southern and Eastern Africa Session, 17:30-19:00h

Oral Presentations

- Systematic Monitoring of Voluntary Medical Male Circumcision Scale-up (SYMMACS): Zimbabwe [Session: HIV Detection Methods and Surveillance], 11:30-11:45h
- Measuring and Evaluating Adverse Events for Male Circumcision Clients who were Passively and Actively Followed Post-MC in Swaziland [Session: Monitoring and Evaluation of HIV Programmes], 14:15-14:30h

Non Abstract Driven Session

A Gateway for an HIV-Free Generation: Collaborative African Leadership for Safe Male Circumcision, 14:00-15:30h

Poster Exhibition

Day 1, 9:00-18:00h

- A Sustainable Approach to Community-based Social Mobilization for Voluntary Medical Male Circumcision in Nyanza, Kenya
- A Public-private Support Process for a Male Circumcision Campaign in Swaziland

- Notification and Management of Post Circumcision Adverse Events and General Service Inquires Using Government Hotline: The Swaziland Experience
- Training of Health Workers on Adult and Adolescent Male Circumcision Under Local Anesthesia for HIV Prevention (MC) in Swaziland, Using a Blended Approach
- Identifying the Unmet Need for Medical Male Circumcision among New Military Recruits in Ethiopia
- Projecting Appropriate Targets for Adult Male Medical Circumcision with Population-based Survey Data in a Generalized Epidemic — Case of Swaziland
- Community Voices: Addressing the Issues Arising in Male Circumcision Implementation in Kenya
- Feasibility of Implementing Newborn Male Circumcision Services in Swaziland — A Country That Does Not Traditionally Circumcise
- Anticipative Study on Social Perception about New Ways of HIV Prevention in Slender Resources Areas: Circumcision and Vaccine
- Taking Safe Male Circumcision Services to a Fishing Village in East Central Uganda
- Acceptability of Newborn Male Circumcision in Mankayane: A Rural District in Swaziland
- Male Circumcision Scale-Up, Risk Disinhibition, and Female Sex Workers in Zambia: A Qualitative Exploration

06.12.2011

Oral Abstract Session

Male Circumcision in the Context of HIV Prevention, 10:45-12:15h

- Male Circumcision for HIV Prevention Safe Even in High Volume Settings: The Example of Iringa, Tanzania, 10:45-11:00h
- Applying the WHO MOVE Guidance for Male Medical Circumcision - The Cost of Facility-based Provision in a Test Case for South Africa, 11:00-11:15h
- Attitudes and Acceptability of Male Circumcision: One Year after Launch of the National Male Circumcision Policy in Uganda, 11:15-11:30h
- Factors Associated with the Early Resumption of Sexual Activity Following Medical Male Circumcision in Nyanza Province, Kenya, 11:30-11:45h

- Understanding Contradictory Evidence Regarding HIV Risk Reduction among Circumcised Males in Cross-sectional Studies: The Role of Circumcision Status Misclassification and other Factors, 11:45-12:00h

Oral Poster Discussion Session

HIV Prevention Interventions, 12:30-13:30h

- HIV Counseling and Testing (HCT) Uptake in a Medical Male Circumcision (MMC) Setting
- Mobile Male Circumcision Services in the Lake Victoria Islands of Kagera, Tanzania: Program Description and Achievements
- Improving the Informed Consent Process for Adolescents Undergoing Male Circumcision in Zambia and Swaziland

07.12.2011

Oral Presentations

- Voluntary Medical Male Circumcision in Nyanza Province, Kenya: Challenges and Solutions for VMMC Service Providers [Session: Leadership, Policy and Planning: HIV Responses], 11:00-11:15h
- Increasing Male Circumcision (MC) Services Delivery Through Demand Creation and Mentorship at Kitwe Central Hospital, a Tertiary Hospital in Zambia [Session: Collaboration and Partnerships in HIV], 16:00-16:15h
- Top up to 100%: Communicating about HIV Protection Following Voluntary Medical Male Circumcision [Session: Telling It Like It Is: The Role of the Media], 16:30-16:45h
- Wapi (Where) Is Male Circumcision Available in Iringa, Tanzania?: A SMS System Providing Free Information on Service Locations Increases MC Uptake, Impacts Post-Operative Compliance [Session: Telling It Like It Is: The Role of the Media], 16:45-17:00h

Satellite Symposium

Medical Male Circumcision Services Adding to Broader HIV Prevention, Treatment, Care and Support, 17:30-19:00h

- Introduction
Presenter and moderator: Gottfried Hirnschall, Director, HIV/AIDS Department, World Health Organization (WHO)
- Overview of Voluntary Medical Male Circumcision
Presenter: Emil Asamoah-Odei, WHO Regional Office for Africa
- Reaching Adolescents and Young Males with Safer Sex and Risk Reduction Information, Education, Counseling and Condoms
Presenter: Kawango Agot, Impact Research and Development Organization

- Expanding HIV Testing and Counseling
Presenter: Jason Reed, US Centers for Disease Control/President's Emergency Plan for AIDS Relief
- Linking to other Prevention, Treatment, Care and Support Services
Presenter: May Bukuku, Ministry of Health, Tanzania
- Discussion on Integrating Broader HIV Prevention, Treatment, Care and Support Services into VMMC
Moderator: Kevin DeCock, Director, Center for Global Health, US Centers for Disease Control and Prevention

Poster Exhibition

Day 3, 09:00-18:00h

- Perceptions on Circumcision among Female Partners of Recently Circumcised Men in Nyanza Province, Kenya
- Evaluation of the Shang Ring: A Device-assisted Method for Providing Voluntary Medical Male Circumcision in Kenya

08.12.2011

Late Breaker Session

Scaling Up Male Circumcision as an HIV Prevention Strategy, 10:45-12:15h

- Randomized Controlled Trial of the Shang Ring versus Conventional Surgical Techniques for Adult Male Circumcision in Kenya and Zambia, 10:45-10:55h
- One Arm, Open Label, Prospective, Cohort Field Study to Assess the Safety and Efficacy of the PrePex Device for Scale up of Non-surgical Circumcision when Performed by Nurses in Resource Limited Settings for HIV Prevention, 10:55-11:05h
- Effect of Text Messaging on Early Resumption of Sexual Intercourse after Adult Male Circumcision: A Randomized Controlled Trial, 11:05-11:15h
- Is There Behavioral Risk Compensation 12 Months after Circumcision: Interim Results from a Prospective Cohort Study of Circumcised and Uncircumcised Men in Nyanza Province, Kenya, 11:15-11:25h
- Wound Healing and Resumption of Sex Following Medical Circumcision of Adult Males in Kisumu, Kenya, 11:25-11:35h

Poster Exhibition

Late Breaker, 09:00-18:00h

- Infant Male Circumcision Services for HIV Prevention in Nyanza Province, Kenya: Factors Associated with Uptake by Mothers]
- Assessment of Population-Level Changes in Male Circumcision (MC) Prevalence, in Beliefs about Circumcision and in HIV Risk Behaviors Over Two Years of a Voluntary Medical Male Circumcision (VMMC) Program in Kisumu, Kenya

CD-ROM Abstracts

- Greater Female Involvement in Medical Male Circumcision Can Improve Uptake and Outcomes in Communities
 - Scaling up Male Circumcision in Sub-Saharan Africa: Building Synergies Between Traditional and Clinic Settings — Strengthening Partnership Between Traditional Healers and Health Workers: The Casamance Case Study, Senegal, West Africa
 - Maintaining Quality Standards to Prevent Adverse Events in a Medical Male Circumcision Setting
 - The Role of Male Circumcision in the Spread of HIV Infection Southwest Nigeria
 - Rollout of Male Circumcision in Swaziland: Challenges and Lessons Learned
 - Reports from the Field: Success, Opportunities and Challenges of Male Circumcision in Suba District, Kenya
 - Engaging the Kenyan Media to Promote Accurate Coverage of Male Circumcision for HIV Prevention
 - The Use of OSCE for Male Circumcision Skills Validation and Skills Comparison of Volunteer Health Care Workers in Swaziland
-
