

Improving Quality VMMC

Project IQ Webinar Series

Planning for Greater Impact: Using Available Resources and Systems to Focus VMMC Programs

February 6, 2019

Today's objectives

- Review specific examples of project approaches to:
 - Accelerate achievement of performance targets
 - Reach new populations, including clients at risk of HIV exposure
- Discuss other approaches to enhancing VMMC projects for rapid impact

Agenda

Introduction

Carlos Toledo, CDC

**Part 1: Mozambique Performance
Management Tool**

Ruben Frescas, Jhpiego
Mozambique

Q&A

**Part 2: Malawi Targeted Recruitment from
ANC/STI Clinics**

Geoffrey Menego, Jhpiego
Malawi

In Pursuit of the Pivot
Reaching and Serving Clients Aged
15-29 Years

August 24, 2016

Provider Verbal Pre-Screening Questions for Voluntary Medical Male Circumcision

INSTRUCTIONS TO PROVIDERS:

- These questions are intended to identify conditions that may not be apparent through physical screening but could still compromise the safety of VMMC.
- Please verbally ask the following questions **in addition to** performing physical screening of **all** voluntary medical male circumcision (VMMC) clients prior to performing circumcision, regardless of the circumcision method to be used.
- Questions should be asked even if a client or their guardian already completed a written form with similar information.
- If a client answers "Yes" to any of the full questions below, please follow site policies or consult the senior on-site clinician to determine whether any further testing or referral to a specialized provider is needed before circumcision.

*Check if answer is YES –
Consider further screening*

1. Do you have any current or past conditions, or a chronic illness that we should be aware of?
2. Are you currently taking any medications or vitamins? If yes, please list them. *(Consider further screening if client cites medications other than over-the-counter analgesics)*
3. Are you allergic to any medicines?

A Healthy Obsession with Safety:
Improving Programs through
Management and Reporting of
Adverse Events

3 Questions for Safe Injections

- Did you wash your hands?
- Are you using a new needle and syringe EVERY TIME you access a vial?
- Is there any possibility that the vial is contaminated, spoiled, or expired?

Managing Adverse Events of Voluntary Medical Male Circumcision (VMMC)

An orientation for
non-VMMC providers

Project IQ Discussions
Published by Cole Bingham (?) · September 17 at 2:44 PM

Project IQ supports the implementation of voluntary male medical circumcision (VMMC) by standardizing quality approaches and building capacity for improved timeliness, accessibility, actionability, and quality of VMMC data, and hosts periodic webinars convening VMMC field staff and implementing partners to discuss essential topics for maintaining and improving the quality of services.

This is a private Facebook group to continue discussions and share experiences. Please keep a business-appropriate tone and direct questions or concerns to a group administrator.
