

The following chart may aid in determining AE timing and can be displayed in clinics.

Appendix 2: Adverse Event Timing

AE Timing

Surgery	A	B	C	
Device	A	B	C	D

Surgery

- A = Procedure: Time period from VMMC until discharged from the clinic
- B = Early post-op: From clinic discharge on day of procedure through post-op day 6
- C = Late post-op: \geq post-op day 7

Device

- A = Placement: Time period from VMMC until discharged from clinic
- B = In-situ: Time period from clinic discharge on day of procedure through device removal (typically through post-op day 6)
- C = Removal: typically day 7 but is designated any time device is removed by a provider
- D = Post-removal: any time after the device has been removed
