Male Circumcision for HIV Prevention:
Policy and Programmatic Issues

Johannes van Dam and Tanvi Pandit-Rajani
Health Policy Initiative, Task Order 1
May 19–20, 2009
Presentation Overview

- Key Policy Considerations: Program Effectiveness, Service Delivery, Evaluation for Successful Implementation

- Where We are to Date

- Next Steps for MC Policy Planning
Programmatic Effectiveness: Key Policy Questions

What Do We Need to Know?

- Where should MC be done, in terms of HIV prevalence and current MC coverage?
- Which age groups should be targeted?
- What are the barriers to acceptability?
- What is the cost per procedure?
- What is the impact of MC at various levels of scale-up?
Service Delivery: Key Policy Questions

What Do We Need to Know?

- How will resources be mobilized?
- What are the roles of the public and private sectors? Public-private partnerships?
- What is the role of the traditional sector?
- Where should the healthcare system be delivered?
- What is the role of task shifting?
- Should only HIV-negative men be eligible?
- How can MC be positioned in an integrated or comprehensive approach?
Evaluation: Key Policy Questions

What Do We Need to Know?

- How reliable are baseline studies/data?
- How will the quality of service delivery be monitored, including adverse events?
- How will service uptake be monitored?
- What is the potential for an increase in high-risk behavior?
- What is the cost per infection averted?
What Have We Accomplished to Date?

- Conducted a regional study to estimate the cost and impact of MC in Lesotho, Swaziland, and Zambia (2006-2007)

- Developed an MC Decision Makers’ Program Planning Tool (DMPPT) (2007)
  - Estimates the cost and impact of MC at various levels of scale-up
  - Uses the excel-based Spectrum suite of models
  - Was applied in Namibia and Uganda
  - A summary, regional brief and country briefs were developed for the 14 PEPFAR countries

- Developed a policy analysis tool (2007)
  - How should MC be incorporated into existing policies/strategies as part of a holistic approach?
  - What are the potential barriers to policy implementation and how can they be addressed?
  - What is the role of specific individuals/groups in policy dialogue/development and implementation?
What’s Next?

- Application of the DMPPT
  - South Africa: provincial level (summer 2009)
  - Malawi, Zimbabwe, Rwanda possibilities

- Pilot of the MC policy analysis tool
  - Countries TBD based on discussions with UNAIDS, USG, and country partners
Thank you!
