Project IQ Webinar Series

Planning for Greater Impact:
Using Available Resources and Systems to Focus VMMC Programs

February 6, 2019
Today’s objectives

• Review specific examples of project approaches to:
  – Accelerate achievement of performance targets
  – Reach new populations, including clients at risk of HIV exposure

• Discuss other approaches to enhancing VMMC projects for rapid impact
Agenda

Introduction

Part 1: Mozambique Performance Management Tool

Q&A

Part 2: Malawi Targeted Recruitment from ANC/STI Clinics

Q&A

Discussion

Carlos Toledo, CDC

Ruben Frescas, Jhpiego Mozambique

Geoffrey Menego, Jhpiego Malawi

Provider Verbal Pre-Screening Questions for Voluntary Medical Male Circumcision

INSTRUCTIONS TO PROVIDERS:
- These questions are intended to identify conditions that may not be apparent through physical screening but could still compromise the safety of VMMC.
- Please verbally ask the following questions in addition to performing physical screening of all voluntary medical male circumcision (VMMC) clients prior to performing circumcision, regardless of the circumcision method to be used.
- Questions should be asked even if a client or their guardian already completed a written form with similar information.
- If a client answers ‘yes’ to any of the follow-up questions below, please follow city policies or consult the senior on-site clinic to determine whether any further testing or referral to a specialized provider is needed before proceeding.

Check if answer is YES - Consider further screening

1. Do you have any current or past conditions, or a chronic illness that we should be aware of?
2. Are you currently taking any medications or vitamins? If yes, please list them. Consider further screening if client lists medications other than over-the-counter antiseptic.
3. Are you allergic to any medicines?

A Healthy Obsession with Safety:
Improving Programs through Management and Reporting of Adverse Events

3 Questions for Safe Injections
Did you wash your hands?
Are you using a new needle and syringe EVERY TIME you access a vessel?
Is there any possibility that the roll is contaminated, spoiled, or expired?

Managing Adverse Events of Voluntary Medical Male Circumcision (VMMC)

An orientation for non-VMMC providers
