

SOUTH AFRICA

SCORE	PROGRAMME AREA
■	Condom programming: Distribution and use with non-regular partners
■	Voluntary medical male circumcision: Progress towards national targets
■	Pre-exposure prophylaxis: Index of policy and programmatic readiness
■	Key populations programme coverage and outcomes (condom use/safe injections): Sex workers Men who have sex with men People who inject drugs
■	Adolescent girls and young women: Programme coverage and outcomes (condom use) in high-incidence settings

LEGEND INCLUDING SCORING LEVELS*

■ Very good (9.0–10.0)	■ Moderate (6.0–6.9)	■ Very low (0.0–4.9)	■ Pillar not applicable in country
■ Good (7.0–8.9)	■ Low (5.0–5.9)	■ Insufficient data	

*Detailed information on indicator definitions and values is available at <https://hivpreventioncoalition.unaids.org/global-dashboard-and-country-scorecards/>.

KEY ACHIEVEMENTS IN PAST 6 MONTHS

- The country's president has committed to overseeing progress towards reducing new infections by 75% to 88 000, as per the HIV Prevention 2020 Road Map.
- The South African National AIDS Council (SANAC) has re-established a prevention technical task team and technical working groups for each of the five prevention pillars; national prevention programme targets are being revised in line with 2016 Political Declaration targets.
- There is a public debate including engagements by parliamentarians on the decriminalization of sex work.

NEXT STEPS IN 2018

- SANAC will strengthen HIV prevention programme monitoring and accountability by developing and validating a national HIV prevention score card; expanding data collection to include the private sector, the United States President's Emergency Plan for AIDS Relief, and all government departments, through an integrated focus for impact platform; and quarterly reporting.
- Policies and service packages for people who inject drugs will be defined to supplement those already existing for adolescents and young women, sex workers, and men who have sex with men.
- Prevention cascades similar to the 90–90–90 treatment cascade will be developed for all five pillars of prevention.
