Project IQ

• Project IQ: “Technical Assistance to Provide High-Quality VMMC Services to Programs Supported by PEPFAR”

• CDC headquarters mechanism which field offices can also put COP funds into for country-specific specific quality activities

• Project period: April 1, 2015 – March 31, 2020
Project IQ: Goal & Objectives

• Provide comprehensive global TA to support safe, high quality VMMC programs:

  – Integrate standards and indicators within national systems
  – Standardize quality approaches
  – Improve timeliness, accessibility, actionability, and quality of VMMC data
  – Build local capacity to implement QA and CQI
  – Evaluate effectiveness of QA/CQI in improving quality of VMMC services
Project IQ: Scope of Activities

- Tool digitization
- CQI design and implementation
- Technical assistance
- Service delivery support
- Knowledge exchange
Webinars

• Purpose: Convene USG VMMC field staff and implementing partners, and other key stakeholders including Ministries of Health to discuss essential topics for maintaining and improving the quality of VMMC services.

• Join Project IQ mailing list, write Tara.Devezin@jhpiego.org
Project IQ Updates
and Upcoming Projects
Now available: training modules

Managing Adverse Events of Voluntary Medical Male Circumcision (VMMC)

About: A tool for VMMC teams to orient non-VMMC providers to surgical and device-based VMMC healing, AEs, basic AE management, criteria for referral to specialists/higher level of care, and AE reporting.

Email Tara.Devezin@jhpiego.org

About: Familiarizes participants with vital injection safety practices specific to VMMC, to ensure programs prevent provider actions that could create risk of client and healthcare provider exposure to these infections.

Available on Project IQ Resources Web Page
Now available online & in shipment: 2nd ed. Adverse Event Action Guide
